Hi s22
Sorry for the slow reply. Will source the HAZID documentation and provide in the Objective folder today.
Happy to take any other queries you might have and definitely happy for you to come into the office next week. If you're already planning to be in Canberra on Wednesday let's not add another trip to your calendar. I'll have a chat to Tim and s22 make sure they're available otherwise we'll find another time slot to chat online. I'll try to confirm that for you this afternoon.

Happy Friday!

Good afternoon,

How are you both? I had a quick question on whether the revised version of the draft HAZID was available and if it could be put into the folder. No rush if it is not. It's mainly the assumptions behind the dose calculations that am after

I also have some queries which am putting together to ask on the draft documents. I may have them ready by next week. They shouldn't require any changes, it's for my own clarification only. I also wanted to discuss public consultation with you and what would be needed for the submission (and any other documents you may want to publish). The plan is to request public comment I am in Canberra next Wednesday so could meet Wednesday morning, Tues, or Thurs if that would suit. Can also do a skype meeting of course.

Let me know your thoughts.

Cheers

Hi s22

I've added the most recent SAR iteration (including the HAZID information) to the folder in Objective for your perusal. FYI I've re-organised it slightly just to keep it a bit neater, creating sub-folders for older docs from back in Dec and then newer versions for Feb this year

Let me know if you have any issues
