Hi s22

Thanks for the chat just now. As per the outcome from yesterday's meeting between the DG and CEO ARPANSA, please accept this meeting invite to discuss what activities are planned for SRF-W, what nuclear materials and radiological hazards will be present, what the activity levels are expected and site characteristics (e.g. seismic, environmental, human, etc.) in order to inform the licensing approach for the Agency.

I will let you forward on to the ARPANSA representatives you would like in the room s22

Kind regards,

Hi Rick and s22 [redacted]

I hope this email finds you both well. Rick, I left you a voice mail last week so I am just following up. s22 sent us an email a few weeks ago to let us know that quite a few ARPANSA team members are away until the 2 Oct and that you were both nominated as points of contact for the agency in their absence. We would like to arrange a catch up with you both to discuss the ASA Licensing approach if you are free this week sometime? Alternatively next week works well for us too.

I am not sure if you are both in Canberra this week but if not we can arrange a skype call to meet if that is more feasible?

If you could let me know a few different time slots when you are both free, I can make the arrangements and send you calendar invites.

Look forward to speaking to you soon.

Kind regards,

s22 s22 s22

Subject: RE: s22 Waste Storage Documentation [SEC=OFFICIAL]

Hi s22

Thanks for email. I am just clarifying that you are s22

In the meantime, have you contacted Defence's radiation liaison officer on their documentation for LLW storage? I presume you know s22 s22, so I would encourage you to reach out to him and see what Defence's existing artefacts look like.

Sorry to not be much help at this stage.

Cheers

Subject: s22 Waste Storage Documentation [SEC=OFFICIAL]

OFFICIAL

Hi s22

I wonder if you can put your 'waste-holder hat' on for a moment – or refer me on to the relevant person.

We're interested in your experience of [s22](#) Specifically, we are seeking exemplar documents (artefacts), policies and procedures that are likely to be relevant to LLW storage in terms of the following:

- Waste Management Plan
- Operational Waste Manual
- Workforce training package

The above is not an exhaustive list and we would invite your further direction and guidance in regards to this matter as we develop ASA specific documentation.

I'm not asking you to create anything, but rather share the documentation that you already have to help define what we need to develop.

Some background (I know you know this, but provided for completeness)

[s 47C - deliberative](#)

In order to undertake the necessary work in support of nuclear licensing, organisational architecture and safety governance requirements there are a range of LLW documents (artefacts), policies and procedures that are required by the ASA in support of Submarine Rotation Force (SRF)-West.

Facility or base specific plans and arrangements will need to be developed in support of licensing, for onsite operational LLW management. In advance of any dedicated or bespoke regulations of NPS activities, we plan to design our processes to reflect the existing ARPANSA licencing regime and existing operational practice.

Thanks for considering my request, and I'm happy to discuss.

Regards,
[s22](#)
